MIXING PROCEDURE.

Expected to be required to allow the theoretical capture of all target birds in the flock.

Pre-feed on a hard dry surface, 30-60 grams per bird for 1-3 weeks or until all are fed. Pre-feeding birds with untreated bait is essential. Use the same material for pre-feeding as will be used for the bait. Pre-feeding must be completed prior to baiting.

Prior to baiting:

- Place the required amount of clean bait material in a strong plastic bag.
- Use paraffin, peanut or other vegetable oil as an adhesive agent at the rate of 8-10 mL per kg of bait. Apply the correct amount of oil to the bait.
- Inflated the bag and agitate it until the bait is evenly coated with oil. Pour out the excess coated oil into the oil container.
- Place the excess coated oil into a shielded area where scavenging birds cannot readily access the bait.

Preparation:

- Spray the desired area with the formulation to ensure the theoretical capture of all target birds.

Rules for the use of this product must contact the appropriate State or Territory Authority to address the criteria and ensure that the State or Territory Authority is satisfied.

APPROVED LABEL

DIRECTIONS FOR USE:

DO NOT contaminate bait if non-target species are likely to feed on the bait in significant numbers. To be an authorised person, it is required to complete the State or Territory Authority’s requirements and be an approved person. Persons wanting to be considered to be an authorised person for the use of this product must contact the appropriate State or Territory Authority to address the criteria and ensure that the State or Territory Authority is satisfied.

GENERAL INSTRUCTIONS FOR USE:

For the feeding birds with unbaited bait is essential. Use the same material for pre-feeding as will be used for the bait. Pre-feed on a hard dry surface, 30-60 grams per bird for 1-3 weeks or until all birds are feeding prior to use of the product. During pre-feeding calculate the amount of bait that is required to be received to allow the theoretical capture of all target birds in the flock.

 rules for the use of this product must contact the appropriate State or Territory Authority to address the criteria and ensure that the State or Territory Authority is satisfied.

RENTOKIL INITIAL Pty Ltd

A Rentokil Initial company

For use only in the control of pigeon (Columba livia) and sparrow (Passer domesticus and Passer montanus) as specified in the directions for use.

The bottle must not be sold separately.

Do not destroy box while product still remains.

POISON

KEEP OUT OF REACH OF CHILDREN

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

PROTECTOR OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT:

POISON

KEEP OUT OF REACH OF CHILDREN

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

PRECAUTIONS:

Alphachloralose is a highly toxic substance and should be handled accordingly. During periods when birds are feeding on bait keep areas away from children to avoid any possible contact.

Avoiding contact with Alphachloralose is more effective when ambient temperature is neither high nor low.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT:

Strictly follow instructions to use. Do NOT contaminate other animals with this product or used container.

STORAGE AND DISPOSAL: Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Do not dispose of undiluted chemical on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If recycling is not possible, break, crush or puncture and bury empty containers in a local authority landfill. Empty containers and product should not be burned.

SAFETY DIRECTIONS: Very dangerous. Poisonous if swallowed. When preparing product for use wear elbow-length PVC gloves. If on skin and after each baiting, wash thoroughly with soap and water. After each day’s use, wash gloves and contaminated clothing.

Collection of dead birds: When collecting dead or dying birds wear rubber gloves and appropriate protective clothing.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126; New Zealand 0800 764 766. Avoid giving alcohol.
